“Wide open for sustainable meetings”

2026-04-29

We are pleased to announce that we have started a new series of posts ‘Wide open for sustainable meetings’ related to the implementation of green solutions at events and more broadly to the sustainable development of our city. We are pleased that MICE companies are taking numerous and creative steps to work in harmony with nature.

On our website and social media, you will find extensive materials on subjects such as the MINEV project, which aims to reduce the amount of waste generated during major events, making the city more sustainable and environmentally friendly, and the Festivals for the Climate initiative. We will also provide more details on the measures taken by Krakow venues and companies to organise events in the spirit of sustainability.

Follow our profiles to stay up to date!

On our website and social media you will find extensive materials about, among other things, the MINEV project, which aims to reduce the amount of waste generated during large events, making the city more sustainable and environmentally friendly, the Festivals for Climate initiative. We will also present the activities of Krakow venues and companies to organize events in the spirit of sustainability.

We encourage you to follow our profiles to stay up to date!
