4th World Conference on Physics Education

2024-08-19

The 4th World Conference on Physics Education is organized from 26 to 30 August in Auditorium Maximum JU by the Faculty of Physics, Astronomy and Applied Computer Science, Jagiellonian University, Kraków, Poland, in cooperation with the International Research Group on Physics Teaching (GIREP vzw), The International Conference on Physics Education (ICPE), and the Faculty of Physics and Astronomy, University of Wrocław, Poland.

The theme of the 4th WCPE is Embracing changes together.

The 4th WCPE is a response to the rapid changes and new challenges in the field of physics education. The conference aims to bring together participants from diverse perspectives and levels, fostering a comprehensive discussion on these evolving issues. The ultimate goal is to enhance mutual understanding and rejuvenate the learning experience for the younger generation and society as a whole.
