ABSL Summit conference again in Krakow

2025-06-06

On June 23-25, Krakow will once again host the ABSL Summit, an event that is a platform for meetings, knowledge exchange and inspiration among business leaders, opinion leaders, representatives of local government and the world of science. The slogan of this year's edition is "Embrace technology. Empower people."

It's the umpteenth time that Krakow has been chosen to host this nationally unusual event, which will feature discussions with representatives of the shared services sector about the impact of Talent, Technology and Transformation on business growth strategies. And all this at the ICE Krakow Congress Center - a business and cultural landmark of the city.

Registration form and full agenda available at abslsummit.com.

The event is organized by the Association of Business Service Leaders (ABSL).
