

Information about the Low Emission Zone

2026-01-30

We provide informational materials about the Low Emission Zone in three language versions: Polish, English, and Ukrainian, to help all road users become familiar with the applicable rules.

We remind you that every vehicle entering the LEZ is subject to specific requirements. Special attention should be paid to vehicles registered abroad — they must be registered in the system regardless of whether they meet the required emission standards.

Vehicle registration is carried out exclusively through a dedicated online system, [available here](#).

The system is intuitive, supports several languages, and allows quick registration of a vehicle before entering the Low Emission Zone.

We encourage you to review the available materials and complete the registration before your planned entry into the LEZ. This will help avoid misunderstandings and potential administrative consequences.
