Conference Venue Search Engine

2026-01-29

We have upgraded our conference venue search engine by introducing new features, improving its performance, and enhancing the overall user experience, making it even easier and faster to find the perfect place to host an event.

We are pleased to present the new, improved version of [the Conference Venues Browser](#).

The updated version has been designed with event organizers in mind—those who need quick access to up-to-date, reliable information and a clear presentation of available venues.

What has changed?

In the new version of the search engine, we have introduced:

- a simplified and more intuitive search process,
- clearer venue profiles containing key information needed for event planning,
- an improved data structure that makes it easier to compare locations and choose the right venue.

Adding venues

We are expanding our database of conference venues located in Kraków and the Małopolska region. We invite owners and managers of:

- hotels and hotel facilities,
- restaurants,
- conference centers and meeting rooms,
- museums and cultural institutions,
- event and exhibition venues,
- historic buildings adapted for events,
- universities and educational facilities

If you have any comments or suggestions regarding the search engine, we encourage you to contact us. Every opinion is valuable and will help us continue developing this tool to best meet the needs of the meetings industry.
