

## **Euroheat & Power Congress 2026 in Kraków**

2026-06-15

**On June 10-11, 2026, the Euroheat & Power Congress 2026 took place at the ICE Kraków Congress Centre. It was one of the most important European events dedicated to the energy transition and the future of district heating systems. The congress brought together industry leaders, representatives of public institutions, scientists, and experts from across Europe, becoming a platform for exchanging knowledge and experience in the face of challenges related to decarbonization and energy security.**

### **Key topics and course of the congress**

The event program focused on crucial issues related to the future of the heating sector. During panels and presentations, topics such as the energy Power Congress in Kraków was the result of a multi-stage bidding process that began in July 2024 with an invitation to submit proposals. Establishing cooperation with a national partner—PGE Polska Grupa Energetyczna S.A.—and preparing a highly detailed and comprehensive bid that met the organizer's strict requirements were crucial.

Kraków's proposal stood out both organizationally and substantively, offering a wide selection of venues, a well-developed concept of accompanying events, and strong involvement from local institutions. A key stage was a study visit by the organizer's representatives to Kraków, during which the city's infrastructure and cooperation potential were presented. This ultimately led to Kraków being selected as the host city.

### **Why it matters for Kraków**

Hosting events such as the Euroheat & Power Congress is crucial for the city's development. It strengthens Kraków's position as an important hub for international meetings and as a platform for dialogue in the field of sustainable development and modern technologies.

Such congresses attract experts and decision-makers from around the world, fostering business and academic relationships while enabling the exchange of knowledge and experience. Additionally, events of this kind generate tangible economic benefits for the local economy, including the hospitality, gastronomy, and service sectors.

The image aspect is also significant. Kraków's presence on the map of international industry events related to energy transition highlights its commitment to climate action and modern, responsible urban solutions. This, in turn, increases the city's attractiveness as a partner for future initiatives and investments.

### **Kraków as a venue for key debates about the future**

The Euroheat & Power Congress 2026 demonstrated that Kraków is not only an attractive tourist destination but also a professional and reliable host of globally significant events. The success of the
