International Exhibition and Convention Centre EXPO Kraków

2015-03-10

The vision for the creation of a world class trade and congress centre in Kraków was born a long time ago. Since the establishment of our company some 18 years ago, we have had the opportunity to visit a vast number of trade and congress centres all around the world. We have organised hundreds of fairs and congresses in many different parts of Poland and therefore we know many potential problems encountered by event organisers.

The operator of EXPO Kraków is Targi w Krakowie. Targi w Krakowie was established some twenty years ago and is currently southern Poland's largest event organizer, as well as, one of the most prominent organizers of trade fairs and congresses in the country.

That is why we decided to create **International Exhibition and Convention Centre EXPO Kraków** – we are unique in that we are the only such multifunctional facility in Kraków, designed as a venue for congresses, fairs, concerts, industrial meetings and many other events.

Our venue will offer access to **13 thousand square metres**, of which 9 thousand square metres will be exhibition space. We have the ability to organise almost any event in EXPO Kraków.

When creating EXPO Kraków, we focused on multipurpose flexibility and ease in preparing and organising various types of events. Today we hope that Kraków, which for so long was deprived of such a facility, will become an Internationally renowned centre for all types of world class events.

The International Exhibition and Convention Centre EXPO Krakow is:

- 7.2 ha of land in the geographic center of Krakow
- 13 thousand. sq.m of usable area
- 2 halls with a total area of 9 thousand. sq.m a carrying capacity 40 kPa and a height of more than 8 m
- Team of conditioned modular meeting rooms
- The spacious lobby
- Restaurant
- More than 700 parking spaces
- The site of the external exposure

EXPO Krakow opens unlimited possibilities for superbly organized trade fairs, congresses, conferences, sectoral meetings, product presentations, banquets, training, cultural and entertainment events, fashion shows or indoor sports events. The centre's construction also provides for the needs of filming and television production.

This modern complex, with a total surface area of **13,000 sq. m**, includes **two halls**, a number of air-conditioned, modular seminar rooms of various sizes, meeting rooms, a restaurant and a lobby with a surface area of 1,400 sq.m.

The floor area of the two halls (**5,000** and **4,000 sq.m**) is not restricted by any suspension poles or dividing walls, as its construction is based on especially reinforced girders, which allow for the maximum use of space.

In fact the centre's interiors have been designed to have maximum flexibility of arrangement so that every room can be adapted to our clients' creative resources and designs.

The Integrated Building Management System (BMS), combined with a warning sound system, guarantee the highest security and comfort for our guests.

The centre's excellent location at Galicyjska Str. 9 offers excellent, fast access both by city transport and by car. In fact the centre provides for **700** parking spaces; it is also well connected with the PKP railway station and the international airport in Balice.

HALLS

WISŁA HALL

"Wisła" ("Vistula") is the largest of its kind covered hall in southern Poland. It is significant that there are no pillars, making the interior of the Hall open space adaptable according to the needs of customers.

Area (sq.m)	5 000
