TERMIS-EU 2022 Conference comes this June

2022-06-27

Late June and early July mark the time of another congress organised logistically by Mazurkas Congress Management. Under the name Termis EU 2022, researchers and scientists from around the world will have an excellent opportunity to network, acquire new experience, learn and adopt innovative thinking in the growing field of tissue engineering and regenerative medicine.

TERMIS-EU 2022 relies on presenting cutting-edge science in cell biology, biomaterials, biofabrication, 3D tissues and organ development, numerical and experimental methods, clinical applications, and much more. The planned plenary lectures will be complemented by keynotes and scientific theme-oriented sessions and promote the research of students and young investigators (SYIS). The conference will be accompanied by a presentation of more than 20 exhibitors and over 450 posters.

As the one day of workshops and four days of congress at Kraków's ICE congress centre mean very intensive work, some 800 participants will have an opportunity to enjoy the atmosphere of Kraków and discover some unique sites around the city while relaxing in the late afternoon and evening.
