Time for the summary of the month #PROSTOzKRAKOWA

2022-07-18

In June, 718,662 passengers used #KrakowAirport services, which means 4% less than in June 2019, but 255% more than in June 2021! Altogether, we have served 3,191,730 passengers since the beginning of 2022!

‘When planning the development of the Kraków airport in 2022, we assumed that traffic at the Kraków airport would successively increase in spring and summer months. Actually, it is increasing much faster, all due to the huge passion for air travel. We are grateful to all passengers who, in spite of many challengers still being faced by the aviation industry, have chosen the plane as their favourite means of transport,’ proclaimed Radosław Włoszek, President of the Management Board of the Kraków Airport.
