

“Wide open for sustainable meetings”

2024-03-08

We are pleased to announce that we have started a new series of posts “Wide open for sustainable meetings” on implementation of use of greenery at events and more broadly on the sustainable development of our city. We are happy to see MICE companies taking numerous and creative steps to work in harmony with nature.

On our website and social media, you will find extensive materials on subjects such as the MINEV project, which aims to reduce the amount of waste generated during major events, making the city more sustainable and environmentally friendly, and the Festivals for the Climate initiative. We will also provide more details on the measures taken by Krakow venues and companies to organise events in the spirit of sustainability.
